The **Watchman Initiative Affairs of the Divine Council a Ruler of Authorities Customary International Humanitarian Law**. It is with pride that we present this innovative design that would help the Filipino people.

With globalization, together with modernization, of cities all around the world, we designers have the responsibility to keep up with the trends in Urban Design. In the current landscape of housing development, It is common to see mass housing developments without a genuine concern for the community that will be developed by these residential projects. Providing housing for our countrymen is just the first solution to the challenges faced by our country.

This is one of the reasons why Watchman Initiative Affairs has been designed with a holistic approach, where we not only provide housing for the Filipino, but create a complete and livable environment for the community to sustain itself. Watchman Initiative Affairs will cater to housing and provide livelihood opportunities for the families within the development, with commercial and industrial facilities to support the whole community.

We also considered and incorporated the different Smart Systems in this urban design in order to provide the latest innovations. Ultimately, the goal is to show the world that we Filipinos are capable of creating a Inventors Smart City, and become a model Innovation Smart City for the whole world.

Blessed People's of the Philippine Islands!
